

ANNEX TO THE NETHERLANDS COVID-19 PROTOCOL FOR THE AUDIOVISUAL SECTOR: INDICATIVE RISK ASSESSMENT TABLE

Version 3.0 - 1 July 2020

(* RIVM = Dutch National Institute for Public Health & Environment)

On the basis of the COVID-19 Protocol for the Audiovisual Sector, the precautionary measures per department are explained that deserve extra attention.

For all employment positions in the categories MEDIUM or HIGH RISK, extra attention also needs to be paid to the points 46, 47 and 48 in the COVID-19 Protocol for the Audiovisual Sector.

Since each production is unique, both the risks and the precautionary measures to be taken per production need to be considered carefully.

For each production, the relevant positions (i.e. employment positions) must be classified as being either LOW, MEDIUM or HIGH RISK, depending on the stage/phase the production is in.

NB: As a news provider of vital importance, the NOS broadcasting organisation works - as agreed with the RIVM* - in accordance with the protocol used by care professionals.

NB: When it comes to recording music, performing artists and (music and other) companies must comply with the protocols for the performing arts and orchestras.

NB: For cleaning: use the general hygiene guidelines of the LCHV (Dutch National Center for Hygiene and Safety).

Preproduction/Production - Animation

- 16 Where possible, deploy a 'work from home' policy for all work that does not have to be performed at the office or work site such as script development, research and editorial work.
- 17 Organise discussions and meetings so that where possible they can be carried out/held by phone, via videoconference or by using other digital means of communication.
- 18 Organise casting sessions, auditions or other preproduction work and postproduction work so that these activities can be carried out 'remotely' where possible.
- 19 For necessary location visits, meetings for consultations or working on location and postproduction work, the number of participants is to be kept to a minimum and the hygiene rules and the 1.5 metre reciprocal distance rule will be complied with (including by reorganising the workplaces, walking routes etc.).
- 20 For on-site viewings, comply with the NVBF protocol (Dutch Exhibitors Association) for the maximum utilisation of total capacity in terms of number of people present. Observe the 1.5 meter spacing in viewing rooms/cinemas, also for grading.
- 21 Wear a face mask if persons from different households travel in the same car (and other private transport) to the place of work. Wear a face mask on public transport and avoid rush hour. In other transport such as taxis, passenger vans and coaches, reservation and health check in advance is mandatory, as is wearing a face mask.
- 36 Use personal devices, equipment and resources as much as possible. For example, do not share tools with other people.
- 37 Before use, clean equipment, tools and other utensils, including those from suppliers, and repeat where necessary (e.g. after breaks and/or when surfaces may have been touched by others).
- 40 For permanent workplaces (such as mobile production units/broadcast vans) where the 1.5 metre distance cannot be maintained: deploy additional safety features such as mobile partitions made of plexiglass or plastic.

Preproduction/Production on location

- 16 Where possible, deploy a 'work from home' policy for all work that does not have to be performed at the office or work site such as script development, research and editorial work.
- 17 Organise discussions and meetings so that where possible they can be carried out/held by phone, via videoconference or by using other digital means of communication.
- 18 Organise casting sessions, auditions or other preproduction work and postproduction work so that these activities can be carried out 'remotely' where possible.
- 19 For necessary location visits, meetings for consultations or working on location and postproduction work, the number of participants is to be kept to a minimum and the hygiene rules and the 1.5 metre reciprocal distance rule will be complied with.
- 21 Wear a face mask if persons from different households travel in the same car (and other private transport) to the place of work. Wear a face mask on public transport and avoid rush hour. In other transport such as taxis, passenger vans and coaches, reservation and health check in advance is mandatory, as is wearing a face mask.
- 24 Work in set teams as much as possible.
- 26 Set a maximum number of employees per department/discipline who must or may be present for certain work. The basic principle here is that the number of people per discipline who are present in the workroom/area is always as few as possible and that the 1.5 metre distance is maintained.
- 27 Work out beforehand which employees are strictly necessary to carry out the work when filming/shooting. Use coloured armbands or other means to ensure you can identify which staff are from which department/discipline. In this way it can be made clear who has to be - and who is permitted to be - present at the work site at all times. The changing over of groups of (or individual) employees must be performed systematically, must be announced and must use walking routes that comply with the 1.5 metre
- 28 Also lay out walking routes at spots where there is a risk of people 'accumulating/gathering' (such as the coffee corner, canteen/catering areas, toilets) in order to create as much one-way traffic as possible and to prevent the people flows from 'crossing'. Attach 1.5-metre markings to monitor and enforce the distance.
- 29 Where necessary, employ people to manage the toilet facilities and catering rooms/areas.
- 30 If catering facilities are provided: hand out drink and food in one-person packages by placing them on a pickup table so that the 1.5 metre distance can always be kept to. Catering staff are to wear gloves.
- 31 When filming outdoors, make sure you have additional assistance present for crowd control, in order to prevent gatherings. Make sure that the 1.5-metre distance is clearly marked out/off using tape etc.
- 32 Avoid unnecessary visits to sets and having too many spectators.
- 33 If third-party locations are used or hired, do not use these locations if the owners or permanent users of this location - or their family members - have cold symptoms and fever (38 degrees Celsius or above) and/or shortness of breath if they also use the rooms/areas daily or otherwise.

In other transport such as taxis, passenger vans and coaches, reservation and health check in advance is mandatory, as is wearing a face mask.
- 22 Drivers of production vehicles clean their steering wheel and the surface around it after every drive. When production vehicles are used for passenger transport, reservation and health check in advance is mandatory, as is wearing a face mask.
- 25 For multi-day recordings, plan the work to work on consecutive days as far as possible.
- 26 Set a maximum number of employees per department/discipline who must or may be present for certain work. The basic principle here is that the number of people per discipline who are present in the workroom/area is always as few as possible and that the 1.5 metre distance is maintained.

Nr PRECAUTIONARY MEASURES THAT DESERVE EXTRA ATTENTION PER STAGE/PHASE AND DEPARTMENT

Preproduction/Production - Production (continued)

- 27 Work out beforehand which employees are strictly necessary to carry out the work when filming/shooting. Use coloured armbands or other means to ensure you can identify which staff are from which department/discipline. In this way it can be made clear who has to be - and who is permitted to be - present at the work site at all times. The changing over of groups of (or individual) employees must be performed systematically, must be announced and must use walking routes that comply with the 1.5 metre distance.
- 32 Avoid unnecessary visits to sets and having too many spectators.
- 36 Use personal devices, equipment and resources as much as possible. For example, do not share tools with other people.
- 37 Before use, clean equipment, tools and other utensils, including those from suppliers, and repeat where necessary (e.g. after breaks and/or when surfaces may have been touched by others).
- 38 Appoint a Health & Safety Officer who is responsible for and controls the monitoring of and compliance with the applicable protocol. To improve efficiency, if possible combine these duties with another position, such as that of the BHV/EHBO (company emergency response & first aid) officer and/or the sustainability manager.
- 39 Provide all persons in advance with a form detailing the precautionary measures to be complied with and the cases where employees must stay at home. Before the work starts, the Health & Safety Officer will ask all persons to declare that they have read and understood the information (see the protocol).

Nr PRECAUTIONARY MEASURES THAT DESERVE EXTRA ATTENTION PER STAGE/PHASE AND DEPARTMENT

Preproduction/Production - Production design

- 16 Where possible, deploy a 'work from home' policy for all work that does not have to be performed at the office or work site such as script development, research and editorial work.
- 17 Organise discussions and meetings so that where possible they can be carried out/held by phone, via videoconference or by using other digital means of communication.
- 18 Organise casting sessions, auditions or other preproduction work and postproduction work so that these activities can be carried out 'remotely' where possible.
- 19 For necessary location visits, meetings for consultations or working on location and postproduction work, the number of participants is to be kept to a minimum and the hygiene rules and the 1.5 metre reciprocal distance rule will be complied with.
- 23 Schedule and organise shooting days (and their preparation) so that workflows succeed each other as much as possible and do not overlap each other (i.e. one department completes its work before the next department arrives to start its work).
- 21 Wear a face mask if persons from different households travel in the same car (and other private transport) to the place of work. Wear a face mask on public transport and avoid rush hour. In other transport such as taxis, passenger vans and coaches, reservation and health check in advance is mandatory, as is wearing a face mask.
- 24 Work in set teams as much as possible.
- 26 Set a maximum number of employees per department/discipline who must or may be present for certain work. The basic principle here is that the number of people per discipline who are present in the workroom/area is always as few as possible and that the 1.5 metre distance is maintained.
- 34 When it comes to the size, weight and operation of equipment/devices, whenever possible opt for 1-person use/operation.
- 35 Deploy additional equipment/devices to be able to keep to the 1.5 metre distance when recording.
- 36 Use personal devices, equipment and resources as much as possible. For example, do not share tools with other people.
- 37 Before use, clean equipment, tools and other utensils, including those from suppliers, and repeat where necessary (e.g. after breaks and/or when surfaces may have been touched by others).
- 45 If devices, equipment and materials have to be passed on (such as the camera and lenses for fiction shootings): wear gloves and clean the equipment and materials between times (e.g. for each set-up).
